Untreated wood gets its unique character due to the naturalness. Colour or structure variations from the samples shown are standard and have to be accepted. The wood will get a desired patina overtime with daily use, which emphasizes the character of the wood. For further care please notice the general wood information. Puttied areas may have a different colour appearance depending on the surface. For example, dark putty can look lighter on untreated wood.

Each piece of furniture is handmade and unique. Deviations to the listed measurements may be caused by:
 1. different upholstery materials (fabric, leather), 2. processing of ticking mats, 3. the pressure to combine individual parts, etc.
 The seat comfort of a sofa type with larger seat depth usually differs from one with lower depth.
